

Swirly Glitter

Lux

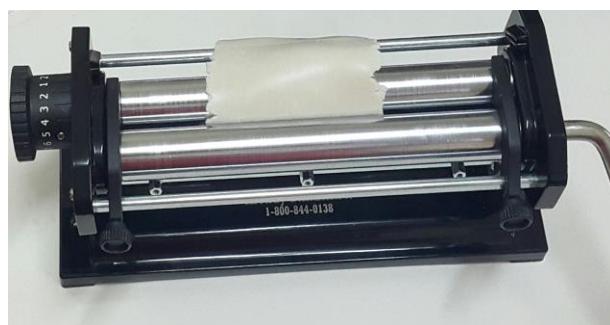

Disclaimer: I am not claiming any ownership of the below mentioned technique...there may be others who are already doing this. Few days back I have posted a veneer of the above jewelry in a FB group, there my friends asked me how did I do this? So this is just an illustration of how I got that veneer with spiral glitter.

Materials Needed:

<ul style="list-style-type: none">• Translucent Clay• Pearl Clay• Pinata or any Alcohol Ink• Metal Leaf	
--	--

Step: 1

Condition Translucent Clay and make a rectangular sheet in the medium setting in your Pasta machine.

Step: 2

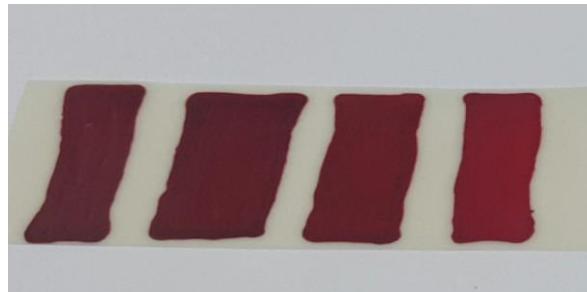

Here are 4 different translucent sheets with 4 different colored inks

Dark Green, Red, Brown, Magenta & Purple. Apply alcohol ink as shown in the figure below.

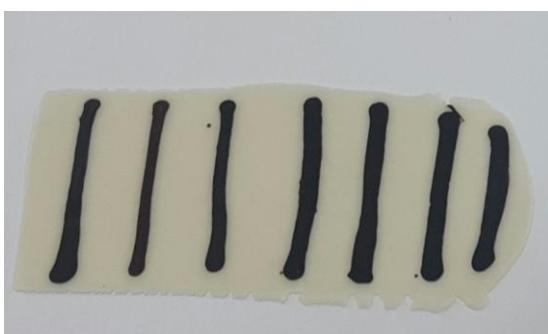

Let it dry completely. It's a must! The ink should dry before proceeding to the next step, otherwise it will be a total mess ;)

1.

2.

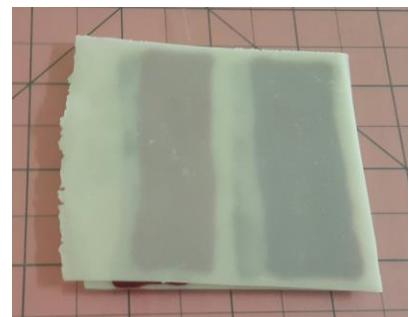

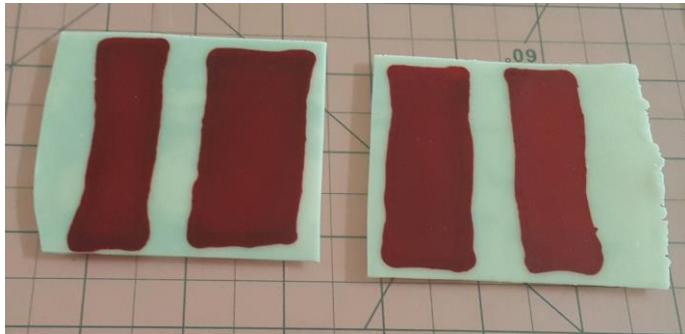

3.

4.

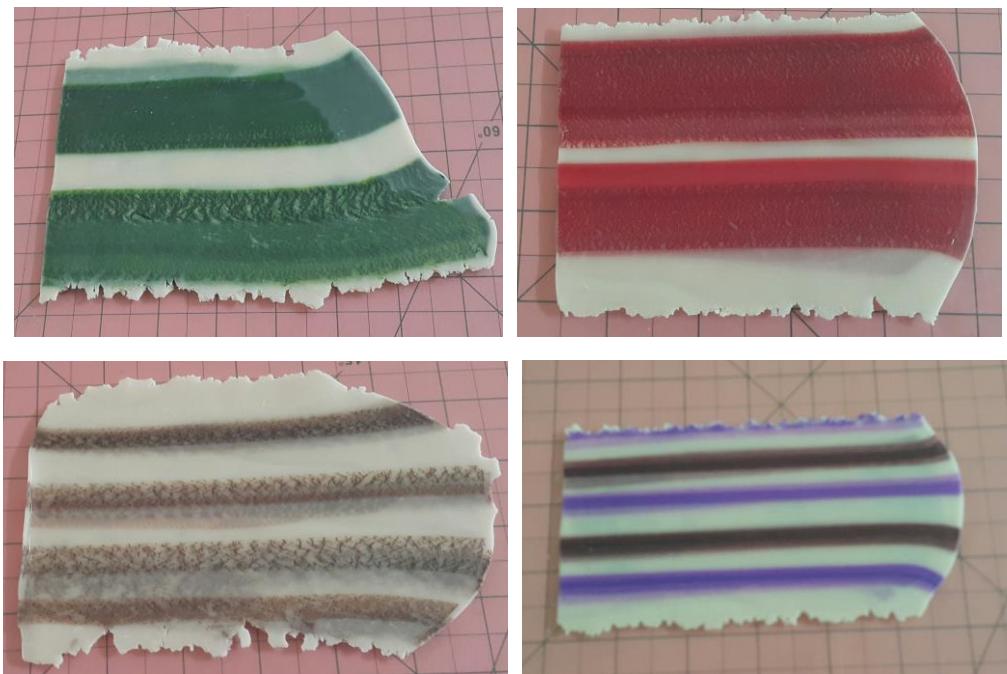

Step: 3

As shown in the below picture divide the sheet in to half and place one on top of the other facing the ink lines together.

Step: 4

Pass the above sheet through a Pasta machine to get a thin long sheet. (Pass through the pasta machine 3-4 times folding the sheet ink face side together.) Make a thin sheet, (not too thin) but thinner than both the halves) Please see the pictures below...

Step: 5

Now cover the sheet with Metal leaf/ foil on both sides...as shown in the picture below...

Step: 6

Roll the sheet as shown below...if the sheet is stiff hold it in between your palms, with your body temperature the sheet will become flexible...

Step: 7

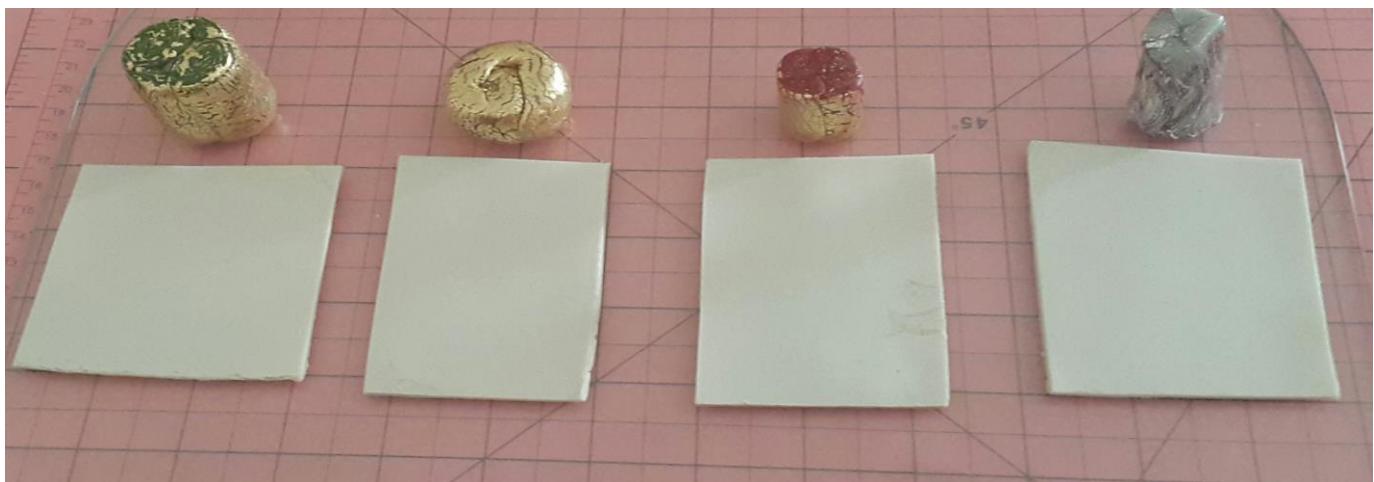

Variation of the design depends in the way, you roll your sheets... I'm showing 4 variations below...

Please see the pictures...

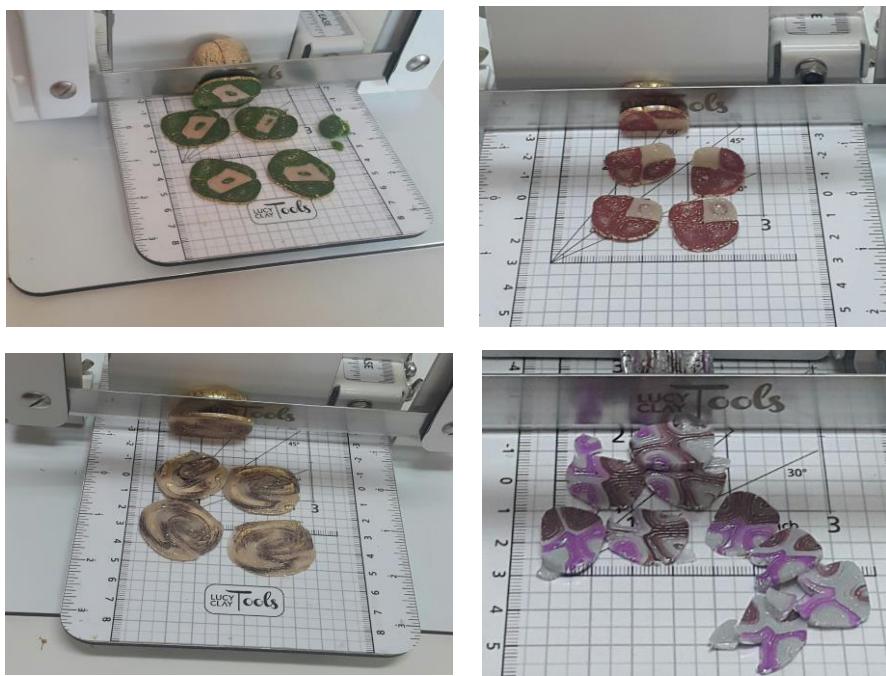

Step: 8

Make a sheet of Pearl clay using Pasta machine in medium thickness... as shown below.

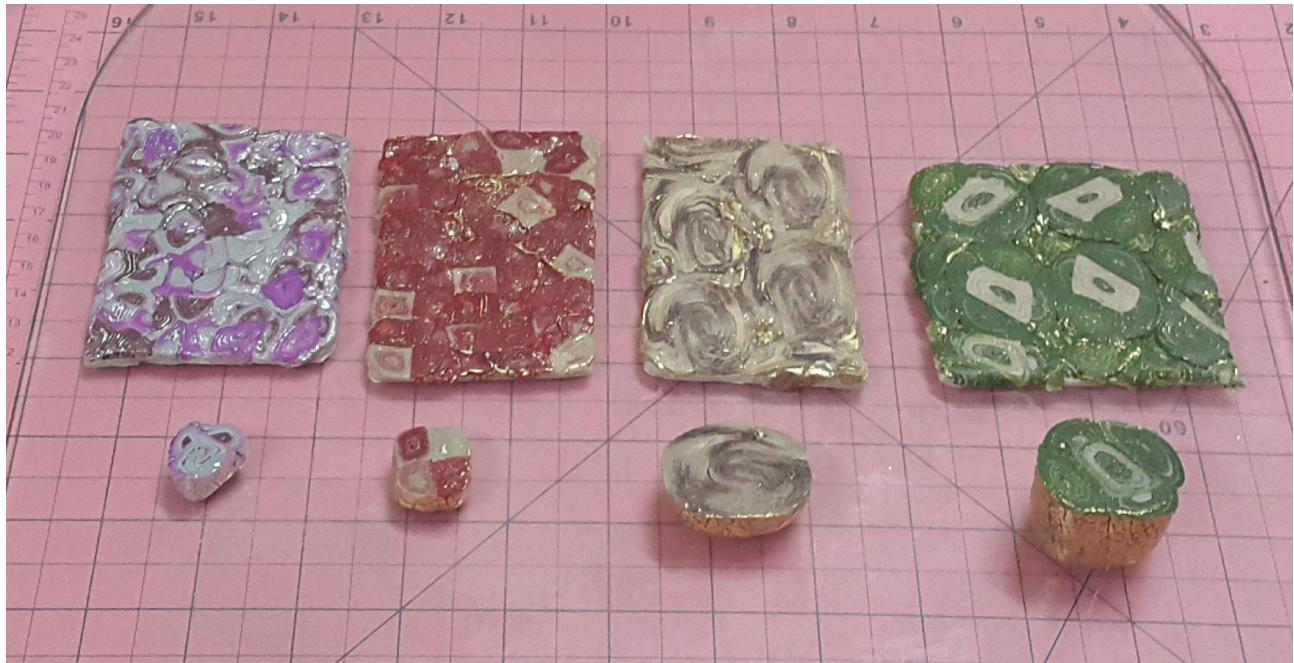

Step: 9

Now make slices of the roll you have made with translucent clay & metal foil. Please see the pictures below...

Step: 10

Now layer the pearl sheet with these slices without leaving any space...squeeze in with small pieces of the slice to cover the gap between the slices...please see the picture below...

Step: 11

Now pass the sheet through pasta machine and make a thin long sheet...pass 2-3 times through pasta machine...alternate lengthwise & breadth wise not to disturb the design...

Now your veneer is ready to use. Please see pictures below.

I hope you can follow this...

Thank you so much!
